Acknowledgments	\$5
Table of Contents	\$7
List of Tips, Tables, & Significant Figures	\$15
Introduction	\$21
Glossary	\$23
Basic Terms	\$23
Advanced Terms	\$25
Necessary Equipment for Beginning Brewers	\$31
Required Equipment	\$31
Optional but Highly Recommended	\$34
Equipment Kit Comparison	\$35
Section I—Brewing With Malt Extract	1
<hr/>	
Chapter 1	
A Crash Course in Brewing	3
What Do I Do?	3
Brew Day	4
Equipment Needed	4
Preparation	5
Making Wort	7
Fermentation Week(s)	10
Bottling Day	12
Serving Day	15
But Wait! There's More!	16
Chapter Two	
Brewing Preparations	17
The Road to Good Brewing	17
Preparation	18
Sanitation	20
Cleaning Products	21
Cleaning Your Equipment	24
Sanitizing Products	26
Heat	28
Cleaning and Sanitizing Final Thoughts	29
Record Keeping	32
Example Recipe Form	33

Chapter 3

Malt Extract and Beer Kits 35
What is Malt Extract? 35
Beer Kit Woes 36
Shopping for Extracts 38
Finding a Good Kit 39
How Much Extract to Use 40
Gravity vs. Fermentability 40

Chapter 4

Water For Extract Brewing 43
The Taste of Water 43
Home Water Treatment 44
Water Chemistry Adjustment for Extract Brewing 44

Chapter 5

Hops 47
What Are They? 47
How Are They Used? 48
 First Wort Hopping 49
 Bittering 49
 Flavoring 50
 Finishing 50
 Dry Hopping 51
Hop Forms - Pellets, Plug and Whole 51
Hop Types 53
 Bittering Hop Varieties 53
 Aroma Hop Varieties 57
How to Measure Hops 60
Hop Bitterness (IBU) Calculations 62
 Gravity of the Boil 63
 Utilization 64
 Hop Utilization Equation Details 64

Chapter 6

Yeast 67
Yeast Terminology 69
Yeast Types 70
Yeast Forms 70
Yeast Strains 71

Dry Yeast Strains	71
Liquid Yeast Strains	73
Preparing Yeast and Yeast Starters	75
Preparing Dry Yeast	75
Preparing Liquid Yeast	77
When Is My Yeast Starter Ready to Pitch?	80
Using Yeast From Commercial Beers	81
Support Your Local Micro	82
Simple Yeast Ranching	82
Yeast Nutritional Needs	84
Nutritional Supplements	85
Oxygen	85
Aeration is Good, Oxidation is Bad	87

Chapter 7

Boiling and Cooling 89

First Recipe	89
Beginning the Boil	90
The Hot Break	91
Hop Additions	92
Cooling the Wort	93
Water Bath	94
Ice	95
Copper Wort Chillers	95

Chapter 8

Fermentation 97

Factors For A Good Fermentation	98
Yeast Factors	98
Wort Factors	99
Temperature Factors	99
Redefining Fermentation	100
Lagtime or Adaptation Phase	100
Primary or Attenuative Phase	101
Secondary or Conditioning Phase	103
Conditioning Processes	104
Using Secondary Fermentors	105
Secondary Fermentor vs. Bottle Conditioning	106
Summary	107

Chapter 9

Fermenting Your First Batch 109

- Choosing Your Fermentor 110
 - Buckets vs. Carboys 110
 - Airlocks vs. Blowoffs 110
- Transferring the Wort 111
- Conducting Your Fermentation 113
 - Pitching the Yeast 113
 - Fermentation Location 114
 - Primary Fermentation 115
 - Secondary Fermentation 116
 - Racking 116
- Estimating the Alcohol Content 117

Chapter 10

What is Different for Brewing Lager Beer? 119

- Yeast Differences 119
- Additional Time 120
- Lower Temperatures 120
- Autolysis 120
- Lager Yeast Pitching and Diacetyl Rests 121
- When to Lager 122
- Aagh!! It Froze!! 123
 - Should I Add More Yeast? 125
- Maintaining Lager Temperature 125
- Bottling 126
- Brewing American Lager Beer 126
 - Recipe—Typical American Lager 127

Chapter 11

Priming and Bottling 129

- When to Bottle 130
- Bottle Cleaning 130
- What Sugar Should I Prime With? 131
 - Making the Priming Solution 132
 - Using PrimeTabs™ 134
- Bottle Filling 134
- Priming and Bottling of Lager Beer 135
- Storage 136
- Drinking Your First Homebrew 136

Section II—Brewing With Extract and Specialty Grain 139

Chapter 12**What is Malted Grain? 141**

Defining Malted Grain	141
Malt Types and Usages	144
Base Malts	144
Kilned Malts	145
Caramel Malts	146
Roasted Malts	147
Other Grains and Adjuncts	147
Extraction and Maximum Yield	148
Extraction Efficiency and Typical Yield	149
Calculating Your Efficiency	151
Planning Malt Quantities for a Recipe	152

Chapter 13**Steeping Specialty Grains 155**

The Grain	156
Mechanics of Steeping	156
Example Batch	158

Section III—All-Grain Brewing 163

Chapter 14**How the Mash Works 165**

An Allegory	165
Defining the Mash	166
The Acid Rest	168
Doughing-In	169
The Protein Rest and Modification	169
Starch Conversion/Saccharification Rest	170
Manipulating the Starch Conversion Rest	172

Chapter 15**Understanding the Mash pH 175**

What Kind of Water Do I Need?	175
Reading A Water Report	176
Water Hardness, Alkalinity, and milliEquivalents	179
Water pH	180
Balancing the Malts and Minerals	180

Chapter 15 con't

Residual Alkalinity and Mash pH 184
 Determining the Beer Styles That Best Suit Your Water ... 185
 Determining Calcium Additions to Lower the Mash pH ... 186
 Determining Bicarbonate Additions to Raise the Mash pH 187
Using Salts for Brewing Water Adjustment 188

Chapter 16

***The Methods of Mashing* 191**

Single Temperature Infusion 191
Multi-Rest Mashing 192
 Infusion Calculations 194
 Multiple Rest Infusion Example 195
Decoction Mashing 195
Summary 196

Chapter 17

***Getting the Wort Out (Lautering)* 197**

Aspects of Lautering 197
 What is Mashout? 197
 What is Recirculation? 198
 What is Sparging? 198
A Good Crush Means Good Lautering 200
Getting the Most From the Grainbed 201

Chapter 18

***Your First All-Grain Batch* 205**

Suggested Recipe 206
 Partial Mash Option 208
 Starting the Mash 211
 Conducting the Mash 212
 Conducting the Lauter 214
Things You Could Do Differently Next Time 218
No-Sparge Brewing 220

***Section IV—Recipes, Experiment'n, and Troubleshoot'g* 225**

Chapter 19

***Some of My Favorite Beer Styles and Recipes* 227**

Style Descriptions 227
The Ale Styles 233

Wheat	233
Pale Ales	235
English Special Bitter	235
India Pale Ale	237
American Pale Ale	239
Brown Ales	241
Porter	243
Stout	245
Barleywine	247
The Lager Styles	249
Pilsner	249
Classic American Pilsner	251
California Common (Steam-type)	253
Bock	255
Vienna	257
Oktoberfest	259
Chapter Summary	259
Chapter 20	
Developing Your Own Recipes	261
Developing Your Own Recipes	262
Increasing the Body	263
Changing Flavors	264
Using Honey	265
Toasting Your Own Malt	265
Discretion Is the Better Part of Flavor	267
Chapter 21	
Is My Beer Ruined?	269
Common Problems	270
Common Off-Flavors	278
Section V—Appendices	285
Appendix A	
Using Hydrometers	287
Appendix B	
Brewing Metallurgy	291
General Information and Cleaning	292
Aluminum	292

Appendix B con't

Copper 292
Brass 293
Carbon Steel 294
Stainless Steel 294
Galvanic Corrosion 296
Soldering, Brazing, and Welding 298
Toxicity of Metals 300
 Aluminum 300
 Cadmium 300
 Chromium 301
 Copper 301
 Iron 301
 Lead 302
 Zinc 302

Appendix C

Building Wort Chillers 305
Immersion Chillers 306
Counterflow Chillers 307
Hybrid Chillers 309

Appendix D

Building a Mash/Lauter Tun 311
False Bottom or Pipe Manifold? 311
Fluid Mechanics 312
 Efficiency 317
 Uniformity 317
 Configuration Variables 320
Building Copper Pipe Manifolds 325
Choosing Your Cooler 327
Home Mashing Setups 329

Appendix E

Metric Conversions 333

Appendix F

List of Tips, Tables, & Significant Figures

Section I—Brewing With Malt Extract

Chapter 1

A Crash Course in Brewing

Recipe—Cincinnati Pale Ale	6
Brewing checklist	6

Chapter Two

Brewing Preparations

Figure 16—Brewing Preparation	18
Brewing Checklist	18
Figure 17—Yeast and Bacteria	20
Brewing Tip—Cleaning and Sanitizing Bottles	25
Table 2—Dry Heat Sterilization	29
Table 3—Cleaning Products Summary Table	30
Table 4—Sanitizers Summary Table	31
Recipe Form.....	33

Chapter 3

Malt Extract and Beer Kits

Brewing Tip—Canned Beer Kit Rules	37
Figure 23—Building your own kit	38
Recipe—Cincinnati Pale Ale	39
Calculation—Gravity (OG) Calculations	40
Table 5—Typical Malted Barley Sugar Profile	41

Chapter 4

Water For Extract Brewing

Chapter 5

Hops

Figure 27—Lupulin Glands	48
Table 6—Hop Forms and Merits	52
Figure 29— Cascade Hops on the vine.....	56
Calculation—Alpha Acid Units (AAU)	61
Recipe—Joe Ale	63
Table 7—Hop Utilization	65

Chapter 6

Yeast

Figure 31—Yeast Ranch. 67
Figure 32—Budding yeast cells. 5000X 68
Figure 34 and 35—Dry Yeast Rehydration. 76
Steps 4-6—Yeast Starter Procedure 78-80
Necessary Minerals for Yeast Function 84
Figure 41—Aquarium Air Pump Aeration 86

Chapter 7

Boiling and Cooling

Recipe—Cincinnati Pale Ale 89
Figure 42—Starting the Brewing Session 90
(various pictures of brewing). 91-95
Murphy's Laws of Brewing 96

Chapter 8

Fermentation

Figure 52—Picture of Primary Fermentation 102
Figure 53—Picture of Post-Primary Fermentation. 103

Chapter 9

Fermenting Your First Batch

Figure 54—Fermentor Diagrams 109
Figure 55—Pouring the wort into the fermentor. 111
Figure 56—Restraining the Trub. 112
Figure 59—Decision time—to rack or not to rack... 115
Table 8—Percent Alcohol By Volume (ABV) 117

Chapter 10

What is Different for Brewing Lager Beer?

Recipe—Typical American Lager 127

Chapter 11

Priming and Bottling

Figure 64—Racking to the bottling bucket. 132
Figure 65—Nomograph for priming sugar. 133
Figure 66—Bottling using a bottling bucket. 134
Figure 67—Bottling using a siphon 135
Figure 68—How to Pour. 137
Brewing Tip—How to Start a Siphon 137

Section II—Brewing With Extract and Specialty Grain

Chapter 12

What is Malted Grain?

Figure 69—Diagram of Malted Barley 142
Figure 70—Comparison of Malt Colors 144
Table 9—Typical Malt Yields in PPG 150
Recipe—Palmer’s Short Stout 151

Chapter 13

Steeping Specialty Grains

Table 10—Typical Steeping Yields in PPG 157
Recipe—Port O’ Palmer Porter..... 159
(various steeping picutres) 160-161

Section III—All-Grain Brewing

Chapter 14

How the Mash Works

Figure 79—Typical Enzyme Ranges 167
Table 11—Major Enzyme Groups and Functions 168
Brewing Tip—Conversion Check 171

Chapter 15

Understanding the Mash pH

Table 12—Los Angeles Water Report (1996 data) 177
Table 13—Conversion Factors for Ion Concentrations . 181
Table 14—Water Profiles From Notable Brewing Cities 183
Figure 81—Estimating mash pH for Los Angeles..... 186
Figure 82—Determining Calcium Additions. 186
Figure 83—Determining Bicarbonate Additions. 187
Table 15—Brewing Salts for Water Adjustment 190

Chapter 16

The Methods of Mashing

Figure 84—Mashing on the Stove..... 193
Brewing Tip—Use Decoctions to Fix Infusions 196

Chapter 17

Getting the Wort Out (Lautering)

Figure 85—A well crushed grist. 199
Figure 88—Rectangular Cooler Mash/Lauter Tun 203
Figure 89—Preferential flow 204

Chapter 18

Your First All-Grain Batch

Figure 90—Common Mashing Setup	206
Recipe—Tittabawassee Brown Ale	207
Figure 92—Picture of Manifold	209
Figure 93—Picture of Lauter Tun and Manifold	209
Figures 94 & 95—Three tier Gravity-fed Setups	210
Figure 96—Sparge Water Tank	211
(various all-grain brewing pictures)	212-219
Figure 105—Binford Immersion Wort Chiller	217

Section IV—Recipes, Experimentation, and Troubleshooting

Chapter 19

Some of My Favorite Beer Styles and Recipes

Figure 111—Relative Flavors of Beer Styles	229
Three Weisse Guys—American Wheat Beer	232
Lord Crouchback’s Special Bitter—English Pale Ale	234
Victory and Chaos—India Pale Ale	236
Lady Liberty Ale—American Pale Ale	238
Tittabawassee Brown Ale—American Brown Ale	240
Port O’ Palmer—Porter	242
Mill Run Stout	244
Fightin’ Urak-Hai Barleywine	246
Zatec Pils—Pilsener Lager	248
Your Father’s Mustache—Classic American Pilsner	250
No. 4 Shay Steam—California Common Beer	252
Einbock—Bock	254
Cold But Not Baroque—Vienna	256
Denkenfreudenburgerbrau—Oktoberfest	258
